

<div>Module 1</div> <div>Section A: Supply Chains, the Environment, and Strategy</div> <div>Term</div> <div>Business plan</div> <div>APICS CPIM Learning System</div> <div>© 2025</div>	<div>1) A statement of long-range strategy and revenue, cost, and profit objectives usually accompanied by budgets, a projected balance sheet, and a cash flow (source and application of funds) statement. [It] is usually stated in terms of dollars and grouped by product family. [It] is then translated into synchronized tactical functional plans through the production planning process (or the sales and operations planning process). Although frequently stated in different terms (dollars versus units), these tactical plans should agree with each other and with [this concept]. See: long-term planning, strategic plan. 2) A document consisting of the business details (organization, strategy, and financing tactics) prepared by an entrepreneur to plan for a new business.</div>
<div>Module 1</div> <div>Section A: Supply Chains, the Environment, and Strategy</div> <div>Term</div> <div>Competitive advantage</div> <div>APICS CPIM Learning System</div> <div>© 2025</div>	<div>The advantage a company has over its rivals in attracting customers and defending against competitors. Sources of the advantage include characteristics that a competitor cannot duplicate without substantial cost and risk, such as a manufacturing technique, brand name, or human skill set.</div>

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Core process

APICS CPIM Learning System

© 2025

That unique capability that is central to a company's competitive strategy.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Corporate culture

APICS CPIM Learning System

© 2025

The set of important assumptions that members of the company share. It is a system of shared values about what is important and shared beliefs about how the company works. These common assumptions influence the ways the company operates.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Downstream

APICS CPIM Learning System

© 2025

Used as a relative reference within a firm or supply chain to indicate moving in the direction of the end customer.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Environmental scanning

APICS CPIM Learning System

© 2025

A process used to expose an organization's potential strengths, weaknesses, opportunities, and threats. Many experts emphasize opportunities and threats because the tool is primarily external.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Five-forces model of competition

APICS CPIM Learning System

© 2025

A methodology for analyzing competitive pressures in a market and assessing the strength and importance of each of those pressures.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Functional product

APICS CPIM Learning System

© 2025

Mature products that tend to have a low profit margin and a predictable demand.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Key success factors

APICS CPIM Learning System

© 2025

The product attributes, organizational strengths, and accomplishments with the greatest impact on future success in the marketplace.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Macro environment

APICS CPIM Learning System

© 2025

The environment external to a business including technological, economic, natural, and regulatory forces that marketing efforts cannot control.

Module 1*Section A: Supply Chains, the Environment,
and Strategy***Term**

Manufacturing planning and control system
(MPC)

APICS CPIM Learning System

© 2025

A closed-loop information system that includes the planning functions of production planning (sales and operations planning), master production scheduling, material requirements planning, and capacity requirements planning. Once the plan has been accepted as realistic, execution begins. The execution functions include input-output control, detailed scheduling, dispatching, anticipated delay reports (department and supplier), and supplier scheduling. A closed-loop MRP system is one example of a manufacturing planning and control system.

Module 1*Section A: Supply Chains, the Environment,
and Strategy***Term**

Mission

APICS CPIM Learning System

© 2025

The overall goal(s) for an organization set within the parameters of the business scope.

Module 1*Section A: Supply Chains, the Environment,
and Strategy***Term**

Mission statement

APICS CPIM Learning System

© 2025

The company statement of purpose.

Module 1*Section A: Supply Chains, the Environment,
and Strategy***Term**

Product life cycle

APICS CPIM Learning System

© 2025

1) The stages a new product goes through from beginning to end (i.e., the stages that a product passes through from introduction through growth, maturity, and decline). 2) The time from initial research and development to the time at which sales and support of the product to customers are withdrawn. 3) The period of time during which a product can be produced and marketed profitably.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Product positioning

APICS CPIM Learning System

© 2025

The marketing effort involved in placing a product in a market to serve a particular niche or function. Syn.: service positioning.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Resource

APICS CPIM Learning System

© 2025

Anything that adds value to a good or service in its creation, production, or delivery.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

SWOT analysis

APICS CPIM Learning System

© 2025

An analysis of the strengths, weaknesses, opportunities, and threats of and to an organization. Useful in developing strategy.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Service industry

APICS CPIM Learning System

© 2025

1) In its narrowest sense, an organization that provides an intangible product (e.g., medical or legal advice). 2) In its broadest sense, all organizations except farming, mining, and manufacturing. The service industry includes retail trade; wholesale trade; transportation and utilities; finance, insurance, and real estate; construction; professional, personal, and social services; and local, state, and federal governments.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term
Strategic plan

APICS CPIM Learning System

© 2025

A plan for how to marshal and determine actions to support the mission, goals, and objectives of an organization.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term
Strategy

APICS CPIM Learning System

© 2025

For an enterprise, identifies how the company will function in its environment. Specifies how to satisfy customers, how to grow the business, how to compete in its environment, how to manage the organization and develop capabilities within the business, and how to achieve financial objectives.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term
Supply chain

APICS CPIM Learning System

© 2025

The network of suppliers that deliver products from raw materials to end customers through either an engineered or transactional flow of information, goods, and money.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term
Supply chain management

APICS CPIM Learning System

© 2025

The design, planning, execution, control, and monitoring of supply chain activities with the objective of creating net value, building a competitive infrastructure, leveraging worldwide logistics, synchronizing supply with demand, and measuring performance globally.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term
Trading partner

APICS CPIM Learning System

© 2025

Any organization external to the firm that plays an integral role within the supply chain community and whose business fortune depends on the success of the supply chain community.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term
Upstream

APICS CPIM Learning System

© 2025

Used as a relative reference within a firm or supply chain to indicate moving in the direction of the raw material supplier.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term
Value chain

APICS CPIM Learning System

© 2025

The functions within a company that add value to the goods or services that the organization sells to customers and for which it receives payment.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term
Value chain analysis

APICS CPIM Learning System

© 2025

An examination of all links a company uses to produce and deliver its products and services, starting from the origination point and continuing through delivery to the final customer.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Vision

APICS CPIM Learning System

© 2025

The shared perception of the organization's future—what the organization will achieve and a supporting philosophy. This shared vision must be supported by strategic objectives, strategies, and action plans to move it in the desired direction. See: vision statement.

Module 1

*Section A: Supply Chains, the Environment,
and Strategy*

Term

Vision statement

APICS CPIM Learning System

© 2025

An organization's statement of its vision. See: vision.
