<p><b>Term</b></p> <p>Time-based competition (TBC)</p>
<p>APICS CPIM Learning System © 2025</p>

<p>A broad-based corporate strategy that emphasizes time as the vehicle for achieving and maintaining a sustainable competitive edge. Its characteristics are as follows: (1) It deals only with those lead times that are important to customers, (2) the lead-time reductions must involve decreases in both the mean and the variance [from the mean], and (3) the lead-time reductions must be achieved through system or process analysis (the processes must be changed to reduce lead times). Involves design, manufacturing, and logistical processes.</p>

<p>APICS CPIM Learning System © 2025</p>

<p>The degree to which a firm has decided to directly produce multiple value-adding stages from raw material to the sale of the product to the ultimate consumer. [This increases as the number of steps in the sequence increases.] A manufacturer that decides to begin producing parts, components, and materials that it normally purchases is said to be backward integrated. Likewise, a manufacturer that decides to take over distribution and perhaps sale to the ultimate consumer is said to be forward integrated. See: backward integration, forward integration.</p>
