**Module 1***Section B: Demand Analysis and Patterns*

**Term**  
Microeconomics

APICS CSCP Learning System

© 2025

The analysis of the behavior of individual economic decision makers (individuals and firms).

**Module 1***Section B: Demand Analysis and Patterns*

**Term**  
Price elasticity

APICS CSCP Learning System

© 2025

The degree of change in buyer demand in response to changes in product price. Calculated by dividing the percentage of change in quantity bought by the percentage of change in price. Prices are considered elastic if demand varies with changes in price. If demand changes only slightly when the price changes, demand is said to be inelastic. For example, demand for most medical services is relatively inelastic, but demand for automobiles is generally elastic.

**Module 1***Section B: Demand Analysis and Patterns*

**Term**  
Random variation

APICS CSCP Learning System

© 2025

A fluctuation in data that is caused by uncertain or random occurrences. See: random events.

**Module 1***Section B: Demand Analysis and Patterns*

**Term**  
Seasonality

APICS CSCP Learning System

© 2025

A predictable repetitive pattern of demand measured within a year where demand grows and declines. These are calendar-related patterns that can appear annually, quarterly, monthly, weekly, daily and/or hourly. Syn.: seasonal variation. See: base series.
